HOSTED BY CISCO × IN PARTNERSHIP WITH ANTHROPIC

FULL DAY · HANDS-ON

AI ASSURANCE
PARTNER MCP DAY

A full day of hands-on labs with Claude + Cisco MCP servers — no installs, just a browser

Turn plain English into real network action.

Bring a laptop with a browser — that's it. ThousandEyes and Meraki demo orgs are supplied, so there's nothing to install and no scripting or API knowledge required. Use plain language in a browser-based lab platform to interrogate networks, spin up live tests, audit security, and generate a customer-ready report — then see where it's all headed with a live Cisco Cloud Control demo.

WHAT YOU'LL DO — HANDS-ON LABS + LIVE DEMO

ThousandEyes MCP — REQUIRED

Discover a prospect's live services, spin up real tests on the spot, and generate a polished, customer-ready report — the exact demo you'll repeat in the field.

Meraki MCP — REQUIRED

Draw your network from a prompt, run a security audit, and change configuration in plain English — the full ask-to-action loop, live in your browser.

Splunk MCP — OPTIONAL · BONUS

Search, correlate and investigate incidents in plain English — no SPL required. A bonus module for anyone with (or borrowing) a Splunk instance.

Cisco Cloud Control — LIVE DEMO · 15 MIN

See Cisco's new unified AgenticOps platform in action — one login, cross-domain telemetry, and trusted agents working alongside your team across the Cisco estate.

YOUR DAY AT A GLANCE

8:30	Doors, breakfast & get connected
9:00	Welcome & keynote
9:20	AI & MCP fundamentals
9:45	Get-connected checkpoint
9:55	Lab — ThousandEyes MCP (required)
10:55	Morning break
11:10	Lab — Meraki MCP (required)
12:10	Networking lunch
12:55	Lab — Splunk MCP (bonus)
13:45	Afternoon break
14:00	Live demo — Cisco Cloud Control
14:15	Wrap-up & next steps
14:45+	Optional networking drinks

OUTCOMES — WHAT YOU'LL LEARN

- ✓ Understand what MCP is and how agentic AI turns plain English into real network action.
- ✓ Run a live AI demo for your own customers — confidently, without a script.
- ✓ Generate a customer-ready report from real test data in minutes.
- ✓ Audit & reconfigure a network by prompt across ThousandEyes & Meraki.
- ✓ See where Cisco's platform is headed with a live Cisco Cloud Control demo.
- ✓ Bonus: investigate in plain English with Splunk — no query language needed.

SEATS ARE LIMITED. CLAIM YOURS.

Places are capped to keep every lab hands-on.

→ Reserve with your Cisco Account Manager

ALL YOU NEED

A laptop with a modern browser is all you need. ThousandEyes and Meraki demo orgs are supplied — sign in with one API token each, right inside the lab platform. Nothing to install beforehand.

REQUIRED labs run at every event · Splunk MCP is an optional bonus module · Cisco Cloud Control demo included in the full-day format · Breakfast, networking lunch and breaks built in.
